

## **SI2 Technologies, Inc.**

**267 Boston Road  
N. Billerica, MA 01862**

### ***Manager, Security and Information Systems***

SI2 Technologies, Inc. (SI2) is a rapidly growing company whose mission is to enable our country's warfighters to win on and off the battlefield by providing solutions to antenna system and signal mitigation challenges. SI2 is currently seeking highly motivated candidates for a hands-on management position to lead and grow key aspects of our Cogswell award winning security program to safeguard documents, information systems, and physical assets relating to both classified and unclassified programs

As the Manager, Security and Information Systems you will report directly to the Vice President of Contracts and Security executing a wide range of hands-on and managerial activities. You will work as part of a small team comprised of internal and external members to meet the increasing security demands the company is experiencing as part of our rapid growth. This position is an opportunity to make a significant contribution to both the company and nation which could lead to further leadership career advancement.

#### **Job Description**

As the Manager, Security and Information Systems, you will be responsible for the following job functions:

- Continue to develop and grow our company-wide security program to safeguard documents, information systems, and physical assets relating to both classified and unclassified programs
- Manage accreditation and continual oversight of NISPOM and ICD-705 areas
- Implement, maintain and monitor the company's secure Information Systems and communications security (COMSEC) equipment and related procedures in accordance with the relevant requirements
- Author and maintain documentation supporting the Assessment and Authorization of assigned systems in accordance with the Risk Management Framework
- Maintain the Company's programs to ensure compliance with Insider Threat, Confidential Unclassified Information and International Traffic in Arms Regulations requirements.
- Continually update and administer security-related training to company personnel
- Assist with daily activities in JPAS and DISS as well as security audits, pre-inspections, and Industrial security investigations in accordance with the NISPOM

#### **Qualifications, Skills and Experience**

To be a successful Manager of Security and Information Systems, you will possess the following skills and proficiencies:

- Must be a U.S. citizen with an active DoD security clearance. Must be willing to undergo a polygraph.
- Experience in the Defense market with 5+ years' experience working with government security regulations, such as NISPOM, JAFAN, ICD and Risk Management Framework (RMF), 5+ years proficient use of JPAS/DISS and e-QIP and 2+ years' experience with cybersecurity and secure information systems. ISSM and/or ISSO experience is a plus. Completion of FSO Program Management, Industrial Security Professional (ISP) certification, Certified Information Systems Security Professional (CISSP) and/or Certified Information Security Manager (CISM) is a plus.
- Operational experience on programs with SAP/F and/or TS/SCI security requirements.

## SI2 Technologies, Inc.

- Proven track record of accrediting and maintaining new NISPOM and ICD-705 areas and information systems. Experience growing and maintaining security capabilities in a small business environment is a plus.
- Exceptional communication skills (written, verbal as well as listening and presentation) and leadership qualities. Team-player with ability to influence and motivate others. Innovative, enthusiastic and open to new ideas. Enjoy teamwork and excel in a dynamic multi-tasking, small business environment.
- Ability to travel, as required, to customer and partner facilities in support of program security requirements.

### Job Environment

If you have the right stuff to join our team, you will excel in our work environment:

- **Merit-based Team Work** – We have assembled an action-oriented team of smart, creative and energetic technical and business experts passionate about our mission. The dynamic team is comprised of highly educated and talented people in the technical fields of electrical, mechanical, materials, manufacturing and aerospace engineering, chemistry and physics as well as the non-technical fields of business, finance, contracts and security. Our diverse backgrounds, experiences, and perspectives are the keys to our performance. Our team works in an energetic, flexible and small business environment. Each member of the team is offered the reward of individual responsibility with professional mentoring and support to excel and discover his/her full potential to make the greatest impact to the team.
- **Innovative Technology** – We solve complex warfighter problems through “smart” electronic system solutions. Our solutions utilize a combination of conventional and proprietary design, materials and manufacturing techniques to enhance the warfighter's effectiveness while providing increased protection against current, new and emerging threats. Using this technology, our team creates rapid, innovative and cost-effective solutions to the complex and ever-changing battlefield problems facing today's warfighters... We make things smart™.
- **Excellent Compensation** – We believe in rewarding the hard work of our employees with a generous benefits program that we strive to improve and upgrade to meet the needs of our employees. We offer an attractive, complete benefits package, which includes medical, dental, vision, life, AD&D and disability insurance, Flexible Spending – Health and Dependent Care, 401(k), immediate fully vested Company contribution to 401(k) and more. In addition, our employees receive paid time off for holidays, illness, personal use and vacation.
